We had been looking for an affordable home for almost 2 years...either they were too old, too expensive or needed major repair. We talked to our Realtor, and he took us to America's Homeplace. What a nice model center. The staff at America's Homeplace was willing to listen to our wants and needs and make it all happen for us. We had a certain look we were going for and of course a budget and America's Homeplace created our dream for us.

Beth Martin, our building consultant listened to us and explained the entire building process so that we could understand. Beth helped us find a bank that really made things easy. Rodger Gardner, our construction superintendent met with us out on the lot and explained the lot prep process and talked to us about building.

*Lorraine & Heidi*

*We have encouraged several of our friends to build with America's Homeplace and will continue to refer people interested in building a new home.*

*Beth and Rodger were awesome.*
